

Energy Secretary Chris Wright,

Quintessential Misinformation and Misguidance

...in computing, many daily driven mad by autoforce intelligence to commit suicide which is sad and quantum information technologies which is bullsmoke of no practical utility...

Quantum Encryption will never secure anything of value, Quantum Computers will never calculate anything of use.

By connecting these systems, ...

We are going to need a gabillion dongle adapters.

...fusion energy and new materials to quantum computing and life-saving medicines...

fusion energy is a timeeffort waste until there is such overproduction of fission reactors that none can be found in want of one and the goal is to make Venus habitable

...intelligent systems that reason, simulate, and experiment at extraordinary speed...

300 baud?

...AI for discovery, not automation,...

We have another AI for automation, a stored program computer.

...open parts of Genesis Mission platform to qualified researchers,...

for (;unqualified_researchers;) goto ADX_Florence; /* Fixes the pitchfork mob exploit */

snafu

David Richards
